

Bend NOAA Weather Radio

NOAA Weather Radio station WWF-80 provides continuous weather information and forecasts for Central Oregon. Counties in the broadcast area include Jefferson, Deschutes, and Crook.

The broadcast originates from NOAA's National Weather Service (NWS) in Pendleton and transmits from Powell Butte, Oregon on a frequency of 162.500 MHz. Continuous updates are provided.

Any radio with the weather frequency can receive the broadcast, though reception quality will depend upon terrain and distance from the transmitter. Specially built weather radios have the ability to alert you when the NWS issues a weather warning. Weather radios are sold at electronic stores and many discount and department stores. A list of weather radio manufacturers can be found at <http://www.nws.noaa.gov/hwr>

WWF-80 is part of a nationwide network of NOAA Weather Radio transmitters. A portable or vehicle installed weather radio will allow you to receive weather updates on one of these seven frequencies while traveling.

Programming on NOAA Weather Radio Station WWF – 80 includes

- Severe weather watches, warnings, and special weather statements when needed.
- Hydrologic statements such as flash flood warnings and watches when needed.
- Forecasts for Central and North Central Oregon and the North Oregon Cascades.
- Extended forecast up to 7 days for Eastern Oregon.
- Outlook up to 14 days.
- Hourly regional weather reports from around the region.
- Climate and statistical data.
- Non-weather emergency when needed.

During potentially dangerous weather events, NOAA Weather Radio programming may be interrupted to issue warnings. If your weather radio alert receiver is in a standby position it should automatically alarm to inform you of warnings. NOAA Weather Radio is an important part of the Emergency Alert System (EAS).
